```
# Note there might be other ways to do this that give us the same results
# For practice purposes try to fill in the blanks
mtcars %>%
  # step 1
  tibble::rownames_to_column("___") %>%
  # step 2
  dplyr::______(___, ___, ___) %>%
  # step 3
  dplyr::mutate(mpg_group = _________(___ __ 16.7 ~ "___",
                                      ___ _ 16.7 _ ___ __  21.4  ~ "______",
                                      ___ _ 21.4 ~ "____"))
```
