# Open Case Studies: Exploring CO<sub>2</sub> emissions across time

Code

**Disclaimer:** The purpose of the [Open Case Studies](#) project is to demonstrate the use of various data science methods, tools, and software in the context of messy, real-world data. A given case study does not cover all aspects of the research process, is not claiming to be the most appropriate way to analyze a given dataset, and should not be used in the context of making policy decisions without external consultation from scientific experts.
